Direct Vent Gas Fireplace System

Warmth & Beauty

Built Vermont Proud and Strong

Introducing the Vermont Castings Resolution direct vent fireplace system

There is a special place in the Northeast where the warmest seasons of the year are those spent around hearth and home. This special place is Vermont, and at its heart is the foundry. Here fire, friendship and family are woven together with the hand-crafted heritage of Vermont Castings. Now, you can bring some of this magic home with the Resolution direct vent fireplace system. Its large, clear ceramic glass window offers 1080 square inches of viewing area to truly enjoy the warmth and ambiance of the dancing flames. Its dual burner design allows you to shut off the rear burner to reduce the BTUs from 50,000 to 17,000 — making it perfect for installation in nearly any space. The Total Signature Command™ System, including full function handheld remote, provides one of a kind electronic ignition with battery back up — meaning you can operate your gas fireplace even in a power outage — and the ability to turn off the standing pilot makes the Resolution an energy efficient choice as well. With optional Black Texture hand forged arched doors and standard American LedgeStone firebrick walls and hearth brick, the Vermont Castings Resolution offers you the opportunity to weave your own warm memories around hearth and home.
